

Audible and Visual Alarms for Hazardous Locations

EXALM Alarm Series

The EXALM Alarm series was designed to provide a low cost, explosion-proof alarm for gas & dust locations. The alarms provide a warning signal for Air Systems breathing air filtration systems and panels. The EXALM-HL model provides both high level audible alarm and visual strobe. The EXALM-H provides an audible alarm only. Both alarms have 64 user selectable tones and a volume control. The units can be set up by the user for 115 VAC / 60 Hz, 230 VAC / 50 Hz, or 20-28 VDC. Strobe lenses are available in 6 different colors.

US/Canada Approvals: Class 1 and 2, Division 2, Groups A, B, C, D, T2B

ATEX/IECEX Approvals: Group IIA, B, C, Group IIIA, B, C, T1
